Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kasuya et al (US patent 3,912,353).

Kasuya's device discloses a memory socket (32), for mounting a detachable memory card (31) on a circuit board (16), comprising a first memory socket in which a first memory card is inserted (see fig. 1), with a side surface facing upward, a second memory socket in which a second memory card is inserted, with the other surface facing upward said first memory socket (see fig. 1) and said second memory socket being arranged adjacent each other on said circuit board, said first and second memory cards being inserted from the outside of said first and second memory sockets.

However, Kasuya's device fails to disclose the socket being arranged in opposite direction or the pin being identically arranged. It would have been obvious to one having ordinary skill in the art at the time the invention was made to arrange the socket in opposite direction or the pin being identically arranged, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japike*, 86 USPQ 70. It would have been obvious to one having ordinary skill in the art at the time

Art Unit: 2839

the invention was made to arrange the socket in opposite direction in order to meet the system design and requirement.

Conclusion

3. Claims 2-4 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Prior art fails to disclose the combination features the socket with opposed pins arranging identically.
